Rachel Tomas

individual submission for design sprint 1

User Stories

1. As a Bloomington parent, I want to view a list of helpful safety tips to remind my kids about.
2. As a busy Bloomington businessman, I want a dashboard view of the data so I can make decisions quickly.
3. As a pedestrian/ cyclist in Bloomington, I want to know which roads are busiest and quietest to determine my route.
4. As a driver in Bloomington, I want to know which streets have more and less crashes to determine my route.
5. As a Bloomington city official, I want to provide my citizens the history of our crash data by month to assure them of our city's safety and improvements.

Feature List

1. View and interact with a map of Bloomington
2. Have an easy to access and view list of safety reminders and dashboard information
3. Show various graphs with information on reasons for crashes and primary reasons for crashes
4. Show graphs with information about crashes over time
5. Show graphs with information on popularity of different streets for bicyclists and pedestrians
